ACADEMIC PROJECTS

- MoodMate – AI Mental Wellness Assistant (Final Year MCA Project)**
- Developed an AI-powered mental wellness assistant using Llama 3 integrated through Ollama, enabling context-aware conversations with persistent memory for personalized user interactions.
 - Built a responsive Flask web application with local AI inference, providing intelligent chatbot functionality while ensuring user privacy without relying on external AI APIs.
- Inventory Management System (MCA Academic Project) | 2024–2025**
- Built a full-stack web application using PHP, MySQL, and Bootstrap to manage stock, sales, and expired products.
 - Added real-time order notification integration by extending the system with a Guest Order feature.
- Library Attendance Management System (BCA Academic Project) | 2021–2024**
- Developed a QR code-based library attendance system to digitally record student entry and exit timings.
 - Implemented automatic entry and exit logging using dual QR scans with backend integration in PHP and MySQL.
